

AI Portfolio Web App — Master To-Do List

A phase-by-phase execution checklist derived from the Design Document, PRD, and Tech Stack.

PHASE 1 — Foundation Setup

Project Initialization

- ☐ Create Next.js project (App Router)
- ☐ Install and configure Tailwind CSS
- ☐ Install and set up shadcn/ui
- ☐ Install Framer Motion
- ☐ Configure global styles (fonts, colors, spacing)
- ☐ Set up basic layout (Navbar + Footer)
- ☐ Add SEO metadata (title, description, OG tags)

Project Structure

- ☐ Create folders: components, sections, lib, data, app/api
 - ☐ Create reusable layout wrapper
-

PHASE 2 — Visual Design System

UI Foundations

- ☐ Define color palette (backgrounds, accents, gradients)
- ☐ Define typography scale (Hero, H2, body text)
- ☐ Build reusable components:
- ☐ Button (primary + secondary)
- ☐ Card component
- ☐ Section container
- ☐ Badge/Tag for tech stacks

Motion System

- ☐ Create fade-up animation variant
 - ☐ Create stagger animation for lists/cards
 - ☐ Add hover lift effect for cards
 - ☐ Add button hover scale animation
-

PHASE 3 — Core Website Sections

Hero Section

- [] Add bold headline and positioning text
- [] Add CTA buttons (Contact / Projects / Resume)
- [] Add animated gradient or visual background
- [] Add entrance animations

About / Value Section

- [] Add short professional summary
- [] Add 3–4 strength/value cards

AI Sidekick Intro Section

- [] Add section headline + description
- [] Create static AI chat mockup preview
- [] Add CTA to open chat

Experience Section

- [] Build timeline layout
- [] Add experience cards from structured data
- [] Add count-up animation for metrics

Projects Section

- [] Create responsive grid layout
- [] Build project cards (title, description, tech tags)
- [] Add GitHub and Live links

Extras Section

- [] Add personality/insight cards (thoughts, tools, inspirations)

Contact / CTA Section

- [] Add closing headline
- [] Add contact form or email button
- [] Add resume download button

PHASE 4 — Content System

Data Setup

- [] Create data files:

- ☐ bio.json
- ☐ experience.json
- ☐ projects.json
- ☐ Add resume PDF to public folder

Content Population

- ☐ Extract info from latest resume
 - ☐ Extract highlights from old portfolio
 - ☐ Write concise bio and summaries
 - ☐ Write project descriptions
-

PHASE 5 — GitHub Integration

- ☐ Set up GitHub API fetch utility
 - ☐ Fetch repositories dynamically
 - ☐ Filter featured repositories
 - ☐ Map API data to project cards
 - ☐ Add caching (ISR or fetch cache)
-

PHASE 6 — AI Sidekick (Core Feature)

Knowledge Preparation

- ☐ Convert resume into structured facts JSON
- ☐ Convert projects into short summaries
- ☐ Write personality/tone profile for AI

Backend AI Setup

- ☐ Create API route: /api/sidekick
- ☐ Store API key in environment variables
- ☐ Build system prompt with:
 - ☐ Professional background
 - ☐ Skills and projects
 - ☐ Tone/personality rules
 - ☐ Safety boundaries
- ☐ Inject relevant context into each request

Frontend Chat Interface

- ☐ Build chat window component
- ☐ Create message bubbles (user vs AI)
- ☐ Add typing indicator
- ☐ Add suggested prompt chips

- ☐ Add open/close chat interaction

Safety & Quality Controls

- ☐ Add fallback for unknown questions
 - ☐ Limit response length
 - ☐ Prevent AI from inventing achievements
-

PHASE 7 — Motion & Visual Polish

- ☐ Add scroll-triggered section reveals
 - ☐ Add stagger animations for grids
 - ☐ Add background gradient drift or parallax
 - ☐ Add smooth scrolling behavior
 - ☐ Add loading animation for AI replies
-

PHASE 8 — Responsive Optimization

- ☐ Make navbar mobile-friendly
 - ☐ Stack layouts vertically for small screens
 - ☐ Ensure AI chat works smoothly on mobile
 - ☐ Adjust text sizes and spacing for mobile
-

PHASE 9 — Performance & SEO

- ☐ Optimize images and assets
 - ☐ Use Next.js Image component
 - ☐ Add Open Graph image and meta tags
 - ☐ Lazy-load heavy visuals
 - ☐ Run Lighthouse performance audit
-

PHASE 10 — Optional Enhancements

- ☐ Add analytics (Vercel Analytics or Plausible)
 - ☐ Track most asked AI questions
 - ☐ Add dark mode toggle
 - ☐ Add blog/notes section
 - ☐ Explore voice input for AI
-

PHASE 11 — Deployment

- ☐ Push project to GitHub
 - ☐ Connect repo to Vercel
 - ☐ Add environment variables
 - ☐ Deploy production build
 - ☐ Test AI and forms in live environment
-

FINAL PRE-LAUNCH CHECKLIST

- ☐ All sections completed
 - ☐ Real project data added
 - ☐ Resume downloadable
 - ☐ AI answers accurately about you
 - ☐ Mobile layout verified
 - ☐ Site performance optimized
 - ☐ Contact flow tested
-
