

Design Document — Shopify-Inspired Professional Website

Project Overview

Goal: Build a premium, modern professional website inspired by Shopify Editions design language — clean layouts, bold typography, smooth motion, and product-style storytelling.

Positioning: Present the individual like a high-impact digital product: innovative, design-forward, and future-ready.

1. Visual Language & UI System (Shopify-Level Quality)

1.1 Core Design Principles

- **Clarity First** — Strong hierarchy, minimal clutter
- **Premium Minimalism** — Few elements, high visual impact
- **Motion with Purpose** — Animation guides attention
- **Product Storytelling** — The person is presented like a flagship product

1.2 Layout System

- 12-column responsive grid
- Max container width: 1200–1320px
- Section padding: 100–160px vertical spacing
- Flow: Hero → Value → AI → Experience → Projects → Extras → CTA

1.3 Typography

- Headings: Modern sans-serif (Inter / Geist / SF-style)
- Body: Clean, high-readability sans-serif
- Hero headings: 56–72px
- Section headings: 36–44px
- Body text: 16–18px

1.4 Color System

- Background: Soft white or light gray
- Text: Near black
- Accent: Electric gradient (green / blue / violet)
- Cards: Light gray with soft shadows

1.5 UI Components

- Rounded cards (16–24px radius)
 - Soft layered shadows
 - Gradient primary buttons
 - Subtle glassmorphism overlays
 - Floating panels with depth
-

2. AI Sidekick Section (Signature Innovation Feature)

Purpose

Showcase AI as a core part of workflow, creativity, or productivity.

Layout

Two-column section: - Left: Text + feature bullets - Right: Visual AI chat mockup

Content Structure

Headline: Meet My AI Sidekick

Subtext: A short explanation of how AI enhances work and creativity.

Feature Bullets: - Idea generation & brainstorming - Workflow automation - Research & analysis - Creative assistance

Visual Behavior

- Chat bubbles animate in sequence
 - Cursor blink effect
 - Subtle glow on AI responses
-

3. Experience Section (Professional Journey Reframed)

Goal

Turn experience into feature-style storytelling rather than a traditional résumé list.

Layout Style

Timeline + Feature Cards hybrid

Each entry includes: - Role or Focus Area - Organization or Context - 2–3 impact-driven achievements with metrics

Motion

- Cards slide up on scroll
 - Timeline line animates as user progresses
 - Metrics animate with count-up effect
-

4. GitHub Projects Section (Product Showcase)

Section Title

Selected Projects / Things I've Built / Featured Work

Layout

Responsive grid of large interactive cards

Each Card Includes

- Project name
- One-line description
- Tech stack tags
- Buttons: GitHub / Live Demo

Interaction

- Hover lift effect
 - Gradient border or glow appears
 - Subtle tilt or parallax motion
 - CTA arrow animates on hover
-

5. Experience-Driven Storytelling (Site Flow)

1. Hero — Bold positioning statement
 2. What You Do — Clear value proposition
 3. AI Sidekick — Innovation & modern workflow
 4. Experience — Proven impact
 5. Projects — Tangible proof of work
 6. Extras — Personality & depth
 7. CTA — Collaboration invitation
-

6. Motion & Interaction System

Global Motion Rules

- Section reveals: Fade + slight upward motion
- Buttons: Scale 1 → 1.05 on hover
- Cards: Lift + deeper shadow
- Background accents: Slow gradient drift

Recommended Tools

- GSAP or Framer Motion for scroll animations
 - Staggered text reveals
 - Smooth hero entrance sequence
-

7. Extras Section (Personality Layer)

Optional modules to humanize the brand:

Creative/Personal

- Tools or gear used
- Inspirations or influences
- Current focus areas

Thought Cards

Short insights such as: - How I approach problem solving - My creative philosophy - Work principles I follow

Micro-Notes

Small blog-style cards with ideas or learnings

8. Hero Section (Primary Impact Area)

Layout

Left: Bold headline + short positioning statement

Right: Abstract gradient visual or animated 3D mesh

Motion Sequence

1. Background gradient fade-in
2. Headline slide-up

3. Subtext fade-in
 4. CTA buttons appear
 5. Visual element begins subtle motion
-

9. Final Call To Action Section

Design

High-contrast section (dark or deep gradient background)

Content

Headline: Let's build something exceptional.

Buttons: Contact / Resume / GitHub

Glowing gradient accents in background for depth.

10. Suggested Tech Stack

- Framework: Next.js
 - Styling: Tailwind CSS
 - Motion: GSAP or Framer Motion
 - Visuals: Three.js or Spline (optional)
 - Deployment: Vercel or Netlify
-
